**WATER SERVICE**  
**RULES AND REGULATIONS**

**Rule 1 - Adoption of Rules of Regulatory Authorities**

The rules regulating water service prescribed by the Washington Utilities and Transportation Commission, after this called the Commission, are adopted and by this reference are made a part of this tariff.

**Rule 2 - Schedules and Conditions**

The schedules and conditions specified in this tariff for water service are subject to change according to the public service laws of the State of Washington. The amount of water furnished is subject to the Department of Health required standards of quantity and quality. All schedules for water service apply to applicants for or customers receiving water service from the utility.

**Rule 3 - Application and Agreement for Service**

Each prospective customer desiring water service will be required to sign the utility's standard form of application before service is supplied. *The application shall state fully and truly all the purposes for which water may be required. The application is contingent to approval by the utility.*

An application for service is notice that the prospective customer desires water service from the utility and represents agreement to comply with the utility's rules and regulations on file with the Commission and in effect at the time service is furnished. In the absence of a signed application for water service, the delivery of water by the utility through a standard connection and the taking thereof by the customer will constitute an agreement by and between the utility and the customer for the delivery and acceptance of service under the applicable rate schedule(s) and these rules and regulations.

**WATER SERVICE**  
**RULES AND REGULATIONS**

**Rule 4 - Definition of Service**

Service will be supplied as described in these rules and under the applicable rate schedule(s). Service will be supplied only to those who secure their source of water exclusively from the utility, unless otherwise provided under written contract. Water service will be used only for the purpose specified in the service agreement and applicable rate schedule(s). A customer will not sell or permit others to use such service, unless authorized to do so under written contract with the utility.

The customer will not increase demand or use of service as stated in the application for service without giving prior notice *and receiving approval from the utility* of such increase. In the event of such increase, the customer is required to pay the utility's regularly published rates for the increased service from the date of connection and use of the service.

Whenever the customer wants to permanently discontinue the use of water through any fixtures mentioned in the original application, the customer must notify the utility in writing before any reduction in charge will be made.

**Rule 5 - Reconnection Charge / Disconnection Visit Charge**

A reconnection charge, as specified in **Schedule X**, will apply for reconnection of the customer's service to the utility's distribution system. Such charge is to apply only in cases where service has been discontinued for non-payment of delinquent account, request of the customer (seasonal reconnection), and refusal to make proper repairs or similar cause. No charge will be made for reconnection of service if the shut-off was made for the convenience of the utility in making repairs, changes, etc.

When a utility employee is dispatched to disconnect service, that person shall be required to accept payment of a delinquent account at the service address if tendered, but shall not be required to dispense change in excess of the amount due. Any excess payment shall be credited to the customer's account. The charge for a disconnection visit is specified in **Schedule X**.

**WATER SERVICE  
RULES AND REGULATIONS**

**Rule 6 - Installation of Meters and Service Pipe**

The utility will construct service connections of a proper size from its distribution mains to the customer's property. The utility reserves the right to refuse to construct a service connection to any property if the applicant's pipes are not properly constructed and protected.

The utility may meter any flat rate service at its discretion. The utility's metered service rates will become effective, after the customer has received 30 days' written notice. All meters so placed will be installed and maintained by the utility without direct retrofit cost to the customer.

A meter will be installed upon any flat rate service at the request of the customer.

**Rule 7 - Distribution Main Extension**

Utility Allowance - Where elevation and construction conditions allow and one or more bona fide prospective permanent customers request a main extension, the utility will construct and pay for the same, if the utility has sufficient capacity available to meet Department of Health standards of quantity and quality.

Construction Contract - No main extension will be considered *if the total cost exceeds the utility's facility charge, where applicable*. Water main extensions and/or fire hydrants will be installed after contracts have been approved by the Washington Utilities and Transportation Commission pursuant to WAC's for special contracts for water utilities and distribution extensions.

Washington Water Service Company

**WATER SERVICE  
RULES AND REGULATIONS**

**Rule 8 - Responsibility for, and Maintenance of, Services**

The point at which water will be delivered to and received by the customer will be the property line, property corner, or to a location on the property mutually agreed upon (Point of Delivery). The utility will install its meter or other connection device at the Point of Delivery, except, at its option, the utility may install its meter at some other agreed point on the property of the customer, provided that in such event the property line will nevertheless be deemed the Point of Delivery.

The customer will assume all responsibility after Point of Delivery for water supplied by the utility. The utility will be exempt from all liability for loss or damage caused by leakage or escape of water furnished by the utility, after water has passed the Point of Delivery.

All service pipes and fixtures on the customer's side of the Point of Delivery shall be provided and must be maintained and protected from freezing at the customer's expense. Where there are leaking or defective pipes or fixtures, the water may be turned off at the option of the utility until properly repaired. The utility may require any service to be equipped with a freeze protection device to be used during freezing weather instead of permitting water to run continuously from faucets.

**Rule 9 - Access to Premises**

The utility's regularly authorized agents or employees will have access to the premises of the customer at reasonable hours for meter reading, inspection, connection, disconnection, repair or removal of the utility's property.

**WATER SERVICE  
RULES AND REGULATIONS**

**Rule 10 - Interruption to Service**

The utility will make a diligent effort to render uninterrupted service and supply of water. In cases where shut-off is necessary for repair, reconstruction, damage prevention or similar cause, the utility will give one day's advance notice to its customers of such scheduled shut-off. However, the utility will not be responsible for any damage that may result from any cessation of services such as above outlined, nor for failure to give notice of shut-off when circumstances are such that it is impossible to give notice as stated above.

**Rule 11 - Bills**

All bills shall be paid monthly in arrears and are due and payable upon receipt and are considered delinquent fifteen (15) days after the date mailed. Bills will be deemed received upon personal delivery to customer or three (3) days following the deposit of the bill in the United States mail to the customer's last known address. Where the meter has not been read, a minimum bill will be rendered and adjusted when the next succeeding meter reading is available.

Mirrormont Water System customers are billed on a bi-monthly basis; the base charge will be billed one month in arrears and one month in advance. All usage will be billed in arrears. Bills are due and payable upon receipt and are considered delinquent fifteen (15) days after the date mailed. Bills will be deemed received upon personal delivery to customer or three (3) days following the deposit of the bill in the United States mail to the customer's last known address. Where the meter has not been read, a minimum bill will be rendered and adjusted when the next succeeding meter reading is available.

**Rule 12 - Deposits**

The utility may require a deposit in situations where a customer's service has been disconnected for nonpayment of amounts owed to the utility or when a customer is unable to establish or maintain credit with the utility.

The deposit will not be more than an average  
two-twelfths of estimated annual billing.

**WATER SERVICE  
RULES AND REGULATIONS**

**Rule 12 - Deposits** (cont'd)

Interest on deposits will be accrued at the rate calculated as a simple average of the effective interest rate for new issues of one year treasury bill, computed from December 1 of each year, continuing through November 30 of the following year. Interest is computed from the time of deposit to the time of refund and is compounded annually.

Deposits, plus any accrued interest, less any amount owed for service rendered, will be refunded to the customer: 1) where the customer has for 12 consecutive months paid for service when due or 2) upon termination of service.

In addition, the utility will comply with all provisions of the Commission's deposit rules, specifically, the WAC on Deposits.

**Rule 13 - Responsibility for Delinquent Accounts**

The utility will not refuse or discontinue service to an applicant or customer, who is not in arrears to the utility even though there are unpaid charges due from the premises occupied by the applicant or a customer, due to the unpaid bill of a prior tenant unless there is evidence of intent to defraud.

The utility may not permanently deny service to an applicant because of a prior obligation to the utility.

**WATER SERVICE**  
**RULES AND REGULATIONS**

**Rule 14 - Discontinuance of Service**

The utility reserves the right to discontinue a customer's service if the customer:

- (a) Fails to maintain connections, service pipes, or fixtures in good order.
- (b) Damages any service pipe, meter, curb stop valve, seal or other facilities of the utility.
- (c) Vacates the premises.
- (d) Willfully wastes water through improper or imperfect pipes, fixtures or otherwise.
- (e) Fails to make or renew any required deposits, or fails to make payments for water service or any other proper charges accruing under the applicable rate schedules, when due.
- (f) Refuses to allow an employee of the utility to have reasonable access to the premises for the purpose of inspecting the facilities, or for testing, reading, maintaining or removing meters.
- (g) Makes fraudulent use of service.
- (h) Violates any of these rules and regulations.

The right to discontinue service may be exercised whenever and as often as any of the foregoing situations occur, and neither delay nor omission by the utility to enforce this rule any time will be deemed a waiver of its right to discontinue service.

Discontinuance of service by a customer - Customer shall be required to give notice to the utility of their intention to discontinue service.

**WATER SERVICE**  
**RULES AND REGULATIONS**

**Rule 14 - Discontinuance of Service** (cont'd)

A minimum of eight (8) working days' written notice will be given a customer before service is discontinued, except in the case of danger to life or property. A notice must be left at the customer's primary door, service may not be discontinued before 5 p.m. of the 1st day following delivery.

If service is not discontinued within ten (10) working days of the notice date for disconnection, that disconnection notice will become void and a new notice must be provided before the service can be disconnected. However, if the customer has arranged for payments to avoid disconnection of service, a new notice is not required if the customer fails to keep the payment arrangements.

When a utility employee is dispatched to disconnect service, that person shall be required to accept payment of a delinquent account and disconnect visit charge as specified in **Schedule X**. If amount owing is tendered in cash, utility employee will not be required to dispense change for excess of the amount due and owing. Any excess payment will be credited to the customer's account. The utility will restore service when the cause of discontinuance has been removed and payments of all proper charges due from customer have been made.

**WATER SERVICE**  
**RULES AND REGULATIONS**

**Rule 15 - Sprinkling and Irrigation**

Water used for sprinkling and irrigation must be paid for at the regular prescribed tariff rates for such service. The hours for such use will be as prescribed from time to time by the utility, subject to protest by any customer effected and reviewed by the Commission. During peak use months (June through September), and at such other times when demand may be high, the utility may prohibit or limit sprinkling and irrigation to preserve water for domestic consumption.

No person will use water for sprinkling or irrigation purposes during any fire in the area, and all sprinkling or irrigation must be stopped immediately when a fire alarm is sounded. Use of water may be resumed three (3) hours after the fire has been extinguished.

**Rule 16 - Rates**

Rates for water service and supply are those published in the utility's tariff on file with the Commission. Unless otherwise stated in this tariff, the rates apply to a single service, to one customer at one premise. Where two or more families with separate housekeeping establishments occupy the same or separate dwellings, each family using water is considered a separate customer. Each separate housekeeping establishment or business, using water service, will each be considered a customer.

When conditions require that more than one customer be supplied through one meter, (Accessory Dwelling Units) each customer will be charged the minimum charge as provided by the schedule of rates. If the consumption as shown by the meter exceeds the allowance for the minimum charge multiplied by the number of customers, the excess consumption charge will be computed at the regular rates for one customer and the amount prorated equally to the multiple customers, or otherwise as may be agreed among themselves.

Water service must be subscribed to on an annual basis. No proration or reduction in billing is allowed unless this tariff proscribes temporary or seasonal rates.

**WATER SERVICE  
RULES AND REGULATIONS**

**Rule 17 - Account Set-Up Charge/NSF (Non-Sufficient Funds) Charge**

An account set-up charge as specified in **Schedule X** will be made for each new account or change of account responsibility on an existing service. Such charge will be included in the initial billing to the customer. This charge includes the utility dispatching an employee to establish a base meter reading. This account set-up charge does not apply to:

- (a) Installation of a new meter.
- (b) Temporary or seasonal reconnection.
- (c) Owners or agents assuming temporary responsibility for service to vacant premises.

An NSF check charge as specified in **Schedule X** will be made for handling customer checks that have been returned by the bank as NSF or account closed. This charge will be applied to the next billing to the customer.

**Rule 18 - Water Availability Letter Charge**

Any prospective customer seeking a water availability letter or certificate of water availability from the utility must first pay the appropriate charge as specified in **Schedule X**. The water availability letter will include the date issued and the date of expiration. Water availability letters will be valid for no more than one (1) year, or until the expiration of the associated building permit, whichever occurs last.

**Rule 19 – Limitations on Liability**

**(a) General**

The utility's liability, if any, for its gross negligence, willful misconduct or violation of Chapter 19.122 RCW is not limited by this tariff. With respect to any other claim or suit, by a customer or by any others, for damages associated with the installation, provision, termination, maintenance, repair or restoration of service, the utility's liability, if any shall not exceed an amount equal to the proportionate part of the monthly recurring charge for the service for the period during which the service was affected. THERE SHALL BE NO LIABILITY FOR CONSEQUENTIAL OR INCIDENTAL DAMAGES.

**(b) Disclaimer**

THE UTILITY EXPRESSLY DISCLAIMS ALL WARRANTIES, EXPRESS OR IMPLIED, EXCEPT THOSE EXPRESSLY SET FORTH IN THIS TARIFF, INCLUDING, BUT NOT LIMITED TO, IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.

**(c) Relation to Charges**

The charge for services rendered under this tariff are expressly based on the limitations on damages and disclaimer of warranties set forth above.

**Rule 20 – Cross Connection Control**

The Company's Cross Connection Control Program is designed to meet the requirements of WAC 246.290.490. The Cross Connection Control Program is a tool used for the protection of public health.

The program requires a cross connection control survey to be sent to customers no less often than every three years. The survey must be returned within 60 days. If the customer does not return the survey within 60 days, a second survey will be sent. If a completed survey is still not received within the following 30 days, the company will assume that a potential cross connection exists and the customer will be notified that an assembly is required for premise isolation.

Applicants for new service must complete a cross connection control survey as part of the application for service.

The surveys are reviewed by the company's Certified Cross Connection Control Specialist (CCS), or designated responsible person, to determine if a cross connection hazard exists and if so, the degree of health hazard that the existing or proposed cross connection presents. Each service identified as a health hazard and not installed with a backflow prevention assembly will receive a *Notice to Install a Backflow Assembly* indicating the need for a backflow assembly and the type of backflow assembly required to be installed. The customer will be given 90 days from the date of the *Notice to Install a Backflow Assembly* to have an approved assembly installed. Installation will be at the customer's expense.

If proof of installation is not received within 90 days from the date of the *Notice to Install a Backflow Assembly* the customer will be sent a *Disconnection Notice* indicating that water service will be disconnected 45 days from the date of the notice if the Company does not receive proof that a backflow assembly has been installed. Water service will be reconnected when the company confirms a backflow assembly is installed. If service is disconnected, the company will charge the customer its current Reconnection Charge, listed on Schedule X of this Tariff.

(N)

**Rule 20 – Cross Connection Control (continued)**

**Assembly Testing and Inspection**

If a customer has an Approved Backflow Prevention Assembly installed, the assembly must be tested annually by a certified Backflow Assembly Tester. The Company maintains a list of certified Backflow Assembly Testers that are acceptable to the Company. The customer may choose from any Backflow Assembly Tester on the Company's list.

The customer must provide the Company a copy of the annual testing report from the Backflow Assembly Tester within thirty days of the anniversary date of the installation of the approved backflow prevention assembly. If the annual testing report is not provided within thirty days of the anniversary date of the installation of the approved backflow prevention assembly, then the Company will issue a *Notice of Disconnection* pursuant to WAC 480-110-355 (3a). If a copy of the annual testing report is still not received by the date specified for disconnection, the Company will disconnect the customer's service. If service is disconnected, the company will charge the customer its current Reconnection Charge, listed on Schedule X of this Tariff.

The Utility may immediately shut off water service if a public health emergency exists, including when a backflow is occurring or an unprotected cross-connection with or an unapproved water source exists

Lump Sum payment per customer	\$250.00
Look Out Point water system	\$ 6.25
Surcharge to expire July, 2003 - Or upon recovery of \$6,000 loan*	
Lump Sum payment per customer	\$250.00
Clear Creek Estates water system	\$ 3.50
Surcharge to expire July, 2004 - Or upon recovery of \$5,000 loan*	
Lump Sum payment per customer	\$139.00

**Purpose:**

These surcharges are to fund the installation of back-up generators for the above water systems in order to replace line utility power when line utility power fails. This surcharge is the result of a survey of the water customers in which a majority of responses provided support for this funding mechanism.

\*Surcharge to expire as noted above or upon recovery of loan principal, interest charges, and state excise taxes, whichever occurs first. Surcharge may be paid in a lump sum as noted above per customer and save interest cost.

**SCHEDULE NO. 10**  
**SERVICE CONNECTION CHARGE**

**Available**

Within the limits of all Water Service Areas and at utility's option and capability to maintain Department of Health standards of quantity and quality.

**Applicable**

Applies to all new applicants for properties not currently served and within the Commission Service Area (as defined in the tariff) for the utility only when surplus system capacity is available and a direct connection can be made to an existing main that has adequate hydraulic capacity.

**Conditions**

1. A charge will be made the first time a customer's service pipe, 3/4 inch or smaller, is connected to the utility's main. The charge for a larger connection will be the cost of labor and materials. This charge does not include the cost of a meter, or its installation. A meter will be furnished, installed and maintained by the utility without direct cost to the customer.
2. The utility owns and maintains all materials involved in making a service connection.
3. The service connection charge must be paid before the water is turned on.
4. In addition, when it is necessary to bore under an existing road the cost of boring will be in addition to the Service Connection Charge.
5. Meter will be placed in a suitable meter box located at the customer's property line, except when this is not practicable. The meter will be installed upon the customer's premises in some convenient location approved by the utility where the meter will at all times be accessible for reading, inspection and testing. (See Rule 8 & 9)
6. Service Connections will be installed within 7 days from payment, unless prior arrangement in writing are agreed upon by both the customer and the utility.

**Size of Service Connection**

**Service Connection Charge**

3/4 inch service	\$360.00	(I)
Tax Gross-up of 51%	\$183.60	(I)
Total Service Connection Charge	\$543.60	(I)

Larger than 3/4 inch service

**SCHEDULE NO. 11**  
**WATER SYSTEM FACILITIES CHARGE**  
**RESIDENTIAL EQUIVALENT CUSTOMER**  
**SOUTH SOUND DISTRICT**

**Available**

Within the limits of all Water Service Areas and at utility's option and capability to maintain Department of Health standards of quantity and quality.

**Applicable**

Applies to all new applicants for properties not currently served and not within the Commission Service Area (as defined in the tariff) for the utility only when surplus system capacity is available and a direct connection can be made to an existing main that has adequate hydraulic capacity.

**Conditions**

1. The utility will own and maintain all materials involved in the allocation of water service.
2. The Water System Facilities Charge will be in addition to any line extension, service connection, or any other charges that may be provided elsewhere in this tariff.
3. The Water System Facilities Charge will be made one time only at which time the applicant's property is brought into the Water Service Area. If further subdivision of the property is made at a later date, each newly created lot will be subject to an additional facilities charge upon application for water service. If service is greater than residential equivalent, then multiple equivalents may be charged.
4. Exemptions:
  - a) Any end use customer covered by an existing written contract which specifies that no charge or a lower charge will be paid.
  - b) Any end use customer connecting to a water system which was contributed to the company or for which the company paid a nominal amount.

**Charge**

Water System Facilities Charge  
Per residential unit
